Profile

Passionate web developer with almost 10 years' experience, specializing in JavaScript technologies, particularly React.js and Node.js.

Adaptable and proactive in the face of constant changes in the IT sector, I excel in designing innovative, high-performance solutions that are optimized for the user.

Thanks to my technical expertise and my ability to understand business challenges, I'm ready to join a dynamic team to successfully complete ambitious and complex projects.

Professional experience

Lead Developer Front End

Opportunity - Nice, France | 02/2025 - 05/2025

- Developed a web application using ReactJS 18, Node.js, C# .NET 6.0, and Blazor for specific client-side interfaces
- Optimized performance and refactored legacy code to improve maintainability
- Collaborated closely with design teams to enhance UX and implement UI updates
- Actively contributed to Agile ceremonies (daily stand-ups, sprint planning, reviews) within a collaborative environment

TechLead FullStack

M3 Tech - Montreal, Canada | 2022 - 2025

- Led the technical direction of the project (Next.js 13 / ReactJS 18 / Node.js / C# .NET 6.0 architecture) and supported a team of 4 developers (code reviews, pair programming, workshops)
- Designed a modular monorepo using Lerna to centralize the design system and reusable components, improving maintainability
- Defined the architecture (APIs, modules, design system) in collaboration with product teams.
- Implemented automated CI/CD pipelines using Azure DevOps

Mohand Oussadi

Senior Fullstack Developer
ReactJs - NodeJs - NextJs

Education

Université Paris 12 Creteil
2012-2015

Master MIAE

Licence MIAE

Highlights

- Strong ability to collaborate effectively within cross-functional teams.
- Driven by technical challenges and the pursuit of innovative solutions.
- Passionate about emerging technologies and continuously staying up-to-date with industry trends.
- Able to deliver high-quality results under tight deadlines and in high-pressure environments.

Professional experience

FullStack Developer

360 Agency - Montreal, Canada | 2019 - 2021

- Contributed to the pilot team for the design and development of the Kijiji Auto platform using Next.js, ReactJS, and Node.js
- Built complex widgets (e.g., financing simulator, authentication) and integrated them into heterogeneous environments including ASP.NET and Java
- Conducted technical R&D on integrating React micro-apps into various stacks
- REST API integration, navigation management (React Navigation), state management (Context/Redux)
- Set up automated CI/CD pipelines using YAML on Gitlab, with deployment to AWS

FullStack Developer

Videotron - Montreal, Canada | 2017 - 2019

- Participated in the setup of Scrum teams and Agile ceremonies
- Developed and enhanced the "CLIC" ordering software using ReactJS
- Optimized features, performed refactoring, and maintained the product catalog
- Developed automation scripts in Python
- Proposed and implemented technical solutions on both front-end and back-end
- Worked in an Agile environment within teams of 3 to 6 developers

Developer BI en alternance

Essilor - Vincennes, France | 2013 - 2015

- Developed and maintained a decision support tool
- Maintained and optimized multiple databases
- Designed and implemented new features, including real-time reporting
- Created and optimized stored procedures
- Presented the tool and new functionalities to the client
